Alarm Monitoring Center

One of the most important features of Teknim's new generation alarm systems is its Mobile Application support, which allows users to control their own security whenever they want, from anywhere in the world.

With the Cloud-based mobile solution of Teknim, you can get instant information about the status of the alarm system and Arm - Disarm the Control Panel and review the event records.

Teknim Mobile App, which allows multiple alarm systems to be controlled under a single account, serves the highest level of security with special security protocols and encryption algorithms.
