Intelligent Addressable Multi Detector (Optical Smoke and Heat) with Built-in Isolator

TFD-1270

Intelligent Addressable Multi Detector (Optical Smoke and Heat)

EN54-5 EN54-7 EN54-17 EN54-13

TFD-1271 and TFD-1270 detectors use a combination of optical and heat detection technologies to sense fire and it can be connected to a two-wired loop circuit carrying both data and power. It uses FlashLink communication protocol to communicate with Teknim Addressable control panels.

It has a series of algorithms to minimize faulty detections and provide pollution warning. Sensitivity levels are adjustable through the control panel or configuration software. The smoke chamber can be easily removed for cleaning in case of possible pollution in excessively dusty environments.

The operating logic of the detector can be selected from the control panel or software. The detector can work as "Only Smoke", "Only Heat", "Smoke and Heat", "Smoke or Heat".
