

TFY-1000

Teknim Addressable Fire Alarm Configuration Software

TFY-1000 is a configuration software for all Teknim addressable control panels. It has simple interface structure and drag-drop feature makes the software easy to use. It saves installers from significant time losses during configuration. In addition to the functional features on the control panel, the software has additional features of creating scenario, logo upload and back-up of event history. Communication between TFP-12XX panel and software is provided by TCP/IP protocol. All Teknim addressable fire alarm panels support onboard ethernet interface.
